**Background:** This is a Type 1 Task: The Ronald Reagan Washington National Airport is located in Arlington, Virginia. The South Investigation Site (SIS) consists of the southernmost portion of the DCA airport, immediately south of the runways and taxiways and Levee Road, and north of Four Mile Run. The SIS encompasses approximately 58 acres and the majority of the site is covered with grass except for two fenced and paved Satellite Parking Lots B and C. The site is relatively flat and is the result of fill material brought to the area between the 1950s and the 1980s. Several drainage ditches cross the site and direct surface water runoff flows from the site into Four Mile Run and the Potomac River. DCA has been operated by the Metropolitan Washington Airport Authority (MWAA) since June 1987. Prior to 1987, the airport was operated by FAA, which has owned the property since 1941. In FY91, EPA added the SIS to the Federal Agency Hazardous Waste Compliance Docket (Docket).

**Scope of Work:** ABC will participate in DCA SIS Core Team meetings, revise the Exposure Assessment and Control Plan, attend meetings with FAA personnel prior to MWAA beginning RSA enhancements, and evaluate results from FTA2 investigation. As needed, ABC will develop a Phase II SAP for FTA2. For cost estimating purposes, ABC assumed that the scale of the Phase II SAP for FTA2 would be relatively small and would provide a plan for collecting 10 surface and subsurface samples, and four groundwater samples from temporary wells.

**Deliverables:**

Monthly Status Report  
Revised Exposure and Control Plan  
Phase II SAP for FTA2, if required

**FAA Coordination Requirements:** Description of deliverables when required.

**ESA POC:** Steve Hardee, 404-389-8174
